

Dear Chairman Powell and each FCC Member:I understand that the FCC is considering preventing XM Radio or other entities that provide such service from providing Local Weather and Local Traffic forecasts, as well as other locally oriented programming. I wish you would not do this. I have been an over the road truck driver and am now a tow truck operator. I have found the local traffic and weather reports invaluable to my jobs. Many times I have not been able to get traffic and weather reports in a timely manner on local broadcast stations. I am willing to pay to be able to listen to what I want when I want without all the commercial interruptions. Please do not limit my ability to do so. Guy Buckley
